PROFILE

Software Development Engineer with 1+ year of full-stack production experience designing and leading delivery of enterprise ERP/LMS systems using React, C# .NET, and SQL Server. Currently leading a team of 3 developers at an academic institution, owning end-to-end architecture decisions across DB schema design, UI, API development, security, and multi-environment Azure deployments. Strong backend fundamentals in Java, Spring Boot, and REST API design. Proven track record of measurable impact: 80% query performance improvement, 90% reduction in frontend caching failures, and 40% increase in system uptime across 500+ active users.

SKILLS

Programming Languages — Java, C#, JavaScript, TypeScript, Python, SQL

Backend — Spring Boot, Spring MVC, REST APIs, JPA/Hibernate, Node.js, Express.js, Flask

Frontend — React.js, TypeScript, Material UI, HTML5, CSS3, Bootstrap, JavaScript

Database — MySQL, Microsoft SQL Server, PostgreSQL, MongoDB, SQLite, Firebase

Cloud & Devops — Microsoft Azure, CI/CD, Azure DevOps

Architecture — Microservices, Layered Architecture (Controller/Service/Repository), System Design, DB Schema Design, JWT Auth

Testing & Tools — JUnit, Postman, Swagger, Git, GitHub, IntelliJ IDEA, VS Code, Lombok

PROFESSIONAL EXPERIENCE

Dr. D. Y. Patil School of Management & Research

Software Developer

06/2025 – present

Pune, Maharashtra,
India

- Led a team of 3 developers in end-to-end design and delivery of 5+ enterprise ERP/LMS modules — LMS, Mentor-Mentee, Feedback, Admission, and Examination — serving 500+ active students and faculty with 50–100 concurrent users.
- Owned full DB architecture: designed ER diagrams, applied normalization and indexing strategies on a 10,000+ record SQL Server database, improving data retrieval performance by ~80%.
-

CuteCode Street Style Store LLP

Software Developer Intern

09/2024 – 01/2025

Delhi, India

- Engineered a high-volume backend email utility service processing 1,000–10,000 emails/month, integrating third-party APIs (SendGrid/similar) with batching, retry logic, and rate-limiting for reliable delivery at scale.
- Built 15+ dynamic, personalized email templates supporting A/B testing for marketing campaigns, directly enabling data-driven campaign optimization.
- Reduced email delivery latency by 25% by optimizing API request handling and async workflows.
- Improved email logging accuracy by 35%, enabling reliable monitoring, debugging, and analytics across the email pipeline.
- Automated suppression list and unsubscribe management, ensuring regulatory compliance and reducing bounce/spam rates measurably

NielsenIQ Pvt. Ltd.

Intern EIT-Technical Engineer

- Resolved 200+ production support tickets with a 95% SLA resolution rate, managing an average of 150+ tickets/month at a 4.8/5 customer satisfaction score.
- Diagnosed and fixed backend and system-level issues, contributing to a 40% reduction in system downtime.
- Collaborated with senior engineers to triage and resolve complex production issues within 24-hour SLA windows.

01/2023 – 05/2023
Pune, Maharashtra,
India

PROJECTS

Employee Management System

04/2026 – 04/2026

RESTful API built with Spring Boot for managing employee records

Tech Stack: Java 17, Spring Boot, Spring Web, Spring Data JPA + Hibernate, MySQL, Maven, Postman (testing)

- Built a production-ready REST API with full CRUD operations using layered architecture (Controller → Service → Repository), input validation, and global exception handling.
- Integrated Spring Data JPA with MySQL; applied indexing and query optimization patterns for efficient data persistence.

ReelX

02/2025 – 04/2025

AI-Powered Movie Recommendation System

Tech Stack: React.js, Flask, scikit-learn, TMDB API, Tailwind CSS

- Developed a Flask backend generating content-based recommendations via cosine similarity across 5,000+ movie titles using real-time TMDB API metadata.
- Optimized API response pipeline for low-latency real-time recommendations served to a React frontend.

ShopBazaar

01/2024 – 03/2024

E-Commerce Web Application

Tech Stack: MERN

- Designed and implemented backend APIs for authentication, product search/filtering, and order management with JWT-based RBAC for secure user access.
- Integrated Braintree payment gateway and built admin backend workflows for product and order management.

EDUCATION

Master of Computer Applications

Dr. D. Y. Patil Institute of Management & Research
9.36 GPA

11/2021 – 09/2023
Pune, Maharashtra

Bachelor of Computer Applications

Lachoo Memorial College of Science & Technology
90.29% (Gold Medalist)

07/2018 – 09/2021
Jodhpur, Rajasthan

CERTIFICATES

J.P. Morgan Software Engineering Virtual Experience on Forage 

Deloitte Australia Technology Job Simulation on Forage - July 2025 

Hackerrank  — 4 star Java | 5 star Python | 4 star SQL

FreeCodeCamp — Back End Development & APIs
